## Question 2

Unit: billon VND

| Items                                     | 31 /12/2022 | 31/12/2021 | Diggerent | %       |  |
|---|-------------|------------|-----------|---------|--|
| 1. Equity capital                         | 143.296     | 121.989    | 21.307    | 17,47   |  |
| Tier 1 capital                            | 96.781      | 81.018     | 15 763    | 19,46   |  |
| Tier 2 capital                            | 54.041      | 48. 497    | 5 544     | 11,43   |  |
| Decluction                                | 7. 526      | 7.526      | 0         | 0,00    |  |
| 2. Risk-weighted assets                   | 1.605.727   | 1419.209   | 186 518   | 13,14   |  |
| Credit risk-weighted assets               | 1.477.914   | 1.293 484  | 184 430   | 14,26   |  |
| Copital requirement for Operrational Risk | 10.190      | 8.959      | 1231      | 13,74   |  |
| Capital requirement for Market Risk       | 35          | 1.099      | (1.064)   | (96,82) |  |
| 3. Capital adequacy ratio (CAR)           | 8,92%       | 8,60%      | 0,33%     | 3,82%   |  |
| DCAR (capital)                            | 1,50%       |            |           |         |  |
| DCAR (RWA)                                | (1,17)%     |            |           |         |  |
| Total degree or impacts                   | 0,33%       |            |           |         |  |

Looking at the analysis, we see that the (CAR) capital adequacy ratio in 2022 is 8,92%, in 2021 is 8,6%, in 2022 compared to 2021, it will increase 0,33% with an increase rate of 3,82%. This shows that in 2022, BIDV has ensured capital adequacy more than in 2021. The CAR ratio show that, on 31/2/2022 equify capital can guarantee 0,0892 timesthe risk—weighted asset of BIDV, 31/12/2021 equify capital can guarantee 0,086 times the risk—weighted asset (apital adequacy ratio (CAR) in both years is said to ensure regulatory compliance. The increase in (CAR) capital aclequacy ratio in 2022 compared to 2021 is: because equity capital and risk—weighted asset both increased, both but equity capital's growth rate in crease Josfer than the growth rate of risk—weighted asset.

@ Detail:

BIDY's equity capital in 2022 is 143.296 billion VND, in 2021 it is 121.989 billion widony, in 2022 it will increase compared to 2021 is 21.307 billion VND with an increase rate of 17,47 %. This show that BIDV has increase its juminical capacity, thereby increasing its operating network. Comparing equity capital with total assets as 31/12/2022, equity capital accounts for only about 6.89% (total assets as of 31/12/2022: 2.080,180 billion VND), this aquity capital is considered to be at reasonable level. The increase in equity capital has had the effect of increasing the fine bank's CAR by 1,5%.

BIDV's Tier 1 capital in 2022 is 96.781 billion VND in 2021 it is 81.018 billion VND, in 2022 it will increase compared to 2021 is 15.763 billion about with an increase rate of 19,46% Tier 1 capital basically includes bank's equity and disclosed reserve BJDV's Tree 2 capital in 2022 is 54 041 billion VND, in 2021 it is 48-497 billion dory, in 2022 it will increase compared to 2021 is 5544 billion clory with an increase rate of 11,43 90. Tier 2 capital is additional acquiry capital including undisclosed reserves, subordinated debt and other type of capital. The deduction in 2022 and 2021 are all 7.526 billion VND. + BIDV's RNA in 2022 is 1605.727 billion dang, in 2021 it is 1.419.209 billion clong, in 2022 if will increase compared to 2021 is 186.518 billion dong with an increase rate of 13,14 %. The increase in RWAhad the effect

2021 it is 1.419.209 billion clong, in 2022 it will increase compared to 2021 is 186.518 billion dong with an increase rate of 13,14 %. The increase in RWAhad the effect of reclucing the bank's CAR by 1,17 %.

+ Credit risk-weighted assets make up the largest portion of total RWA. Credit risk-weighted assets in 2022 are 1477-91 billion dong with an increase compared to 2021 (1.293.484 billion dong) is 184.430 billion dong with an increase rate of 14,26 %. Credit risk-weighted assets mainly come from Corpo rate Receivables, retail credit portolio, RWA-operational risk in 2022 are 10.190 billion dong, in 2021 it is 8.959 billion dong, in 2021 it is 8.959 billion dong, in 2021 it will increase compared to 2021 is 1.231 billion dong with an increase rate of 13,74%.

RWA-market risk in 2022 are 35 billion dong, in 2022 it will decrease compared to 2021 is 1.064 billion dong with an decrease rate of 96,182%

@ Conclution:

There was an increase in CAR in Year 2022 which also meant that the amount of hisk-weighted adjusted asset ensured by the equity capital had increased. The capital adequacy of BIDV in 2022 grew compared to 2021, which was very important in ensuring the bank's jinancial sajety and encouraging its businesses.
